### Lower Cook Inlet Salmon Fishery News Release #11

**SOUTHERN DISTRICT: Purse seine:** within the Southern District, waters of the Tutka Bay Subdistrict and China Poot Subdistrict excluding Special Harvest Areas (SHAs) in both of those subdistricts, and waters of the Halibut Cove Subdistrict excluding Halibut Cove Lagoon will open for a 16 hour period on Monday, July 1 and on Thursday, July 4 from 6:00 AM to 10:00 PM. The China Poot SHA is defined by Emergency Order as the marine waters shoreward of and enclosed by a line from 59° 34.66' N. lat., 151° 19.27' W. long., to 59° 35.08' N. lat., 151° 19.77' W. long., to 59° 33.09' N. lat., 151° 25.22' W. long., to 59° 32.84' N. lat., 151° 24.90' W. longitude. The Tutka Bay SHA is defined as the marine waters southeast and shoreward of a line from 59° 30.23' N. lat., 151° 28.23' W. long. to 59° 28.63' N. lat., 151° 30.37' W. long., including Tutka Bay Lagoon;

**Set gillnet:** within the Southern District, waters of the Barabara Creek Subdistrict, the Tutka Bay Subdistrict, the Halibut Cove Subdistrict and the Seldovia Bay Subdistrict remain open to commercial salmon set gillnet fishing on a regular schedule of two 48-hour fishing periods per week, from 6:00 AM Monday until 6:00 AM Wednesday, and from 6:00 AM Thursday until 6:00 AM Saturday until further notice. Waters of the Port Graham Subdistrict, including both the Port Graham and English Bay sections, will remain **CLOSED** to commercial salmon set gillnet fishing until further notice as a precautionary measure to protect sockeye salmon returning to English Bay lakes. These areas may open to commercial harvest when spawning escapement levels are consistently tracking to meet the Sustainable Escapement Goal (SEG) of 6,000 – 13,500 fish for this system and provide broodstock for Cook Inlet Aquaculture Association. Through June 27, a total of 4,068 fish had passed the English Bay River weir. This is within the “Inriver Goal” range of 3,527 – 7,009 for this date. The “Inriver Goal” is the sum of the Sustainable Escapement Goal (6,000-13,500) and broodstock goal (1,598) multiplied by the run timing completion percent for this date (46.4%). The English Bay River broodstock goal may be increased if returns do not meet the broodstock goal (2,800) for English Bay stock salmon returning to Tutka Lagoon Hatchery. Commercial harvests from recent set gillnet fishing periods in the Southern District are shown below,

**EASTERN DISTRICT:** Through June 22, a total of 41,400 sockeye salmon (240,000 lbs) have been seine harvested for CIAA cost recovery. This compares to an anticipated 67,900 for this date based on historic run timing where 96% have been harvested by this date and a projected return of 71,000 fish for this year. All other commercial salmon fishing in the Eastern District remains **CLOSED**.

**KAMISHAK BAY DISTRICT:** In the Kamishak Bay District, the Chenik, Bruin Bay, McNeil and Paint River Subdistricts remain closed to commercial harvest. Other waters in this district remain open to commercial salmon seining seven days per week, until further notice. An aerial survey flown on June 24 observed several thousand sockeye salmon in Chenik Lagoon.

Video monitoring at Chenik Lake has counted 10 salmon as of 11:00 AM, on June 24. The next high tide cycle when significant passage into the lake is anticipated begins on July 6. Video data will be retrieved from this site when flying conditions improve.

**OUTER DISTRICT:** The weir at Delight Lake will be deployed next week, (weather permitting).

Closed waters as established by emergency order 2-F-H-001-13 on May 1, 2013 are listed below:

**5 AAC 21.350. Closed waters.** (a) Salmon may not be taken in any of the waters listed in this section.
